

Brian Bocquet, Software Developer

Tokyo, Japan, +818085430081, brianbocquet@gmail.com

PROFILE

Software developer in the making with broad background and languages, coupled with previous professional and international experience. Robust knowledge of programming principles, strong problem-solving abilities and cross-cultural communication skills. Committed, flexible, and always eager to learn more.

EMPLOYMENT HISTORY

Sep 2024 — Jan 2025

Software Developer Intern, foriio

Tokyo

Developed fullstack webapps and REST APIs in NextJs, NestJS, and Ruby on Rails. Databases in Postgres, SQLite and MongoDB. Projects included a dashboard to display all company data from different financial and analytics sources and a data analytics webapp to gather and analyze data from the company's different services. Agile environment and use of Jira/Confluence as well as GitHub. Some experience in CI/CD with AWS as well as working with AWS and Heroku database services.

Jan 2024 — Feb 2024

Software Developer Intern, XLENT Consulting Group

Hudiksvall

Developed the front-end side of an administrative webapp for industrial purposes using React and Typescript. Used Azure DevOps for file management and planning.

Apr 2016 — Jan 2023

Previous Career

Desk and program officer at different public organizations both local, state and international levels from 2016 to 2024 in Sweden and abroad working with development and migration issues.
